VERIFIED SOLUTION CERTIFICATE

NC Marmi

The Water Revolution Foundation (WRF) stamp is awarded to the specific solution Lightweight Marble 10+5 System by **NC Marmi,** affirming their reduced environmental impact over their entire life cycle and therefore being more sustainable.

The reduction in environmental impact was ascertained by performing a comparative LCA study between the product under review and their mainstream version at the time of release.

The study was carried out by 2B, an LCA consultancy, under the oversight of Water Revolution Foundation (WRF), and independently peer reviewed by TETS Institute, a University of Genoa spin-off.

Release date:
03/06/2026
